I am writing to apply for the Data Entry Clerk Virtual Assistant position at Sundayy. I understand the importance of accuracy, organization, and reliability in data management, and I am confident in my ability to contribute effectively to your team.

While my background is in software engineering, I have developed strong data handling skills through years of working with databases and information systems. I am proficient with MySQL, PostgreSQL, and MongoDB, and I am comfortable entering, verifying, and organizing data with precision. My experience with Git and cloud platforms has also taught me to maintain clean, traceable records.

In previous roles, I regularly processed structured data, maintained records, and ensured consistency across systems. I am detail-oriented, self-disciplined, and accustomed to working independently in remote environments. I understand that data entry requires focus, patience, and the ability to follow instructions carefully.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can support Sundayy with accurate and timely data entry work.

Sincerely,

Md Shahanur Islam Shagor
