I am writing to apply for the IT Infrastructure Systems Lead position at Monde Nissin Corporation. Your focus on maintaining reliable IT infrastructure across data centers, servers, networks, and cybersecurity aligns with my technical background in systems operations and secure deployment.

Through my professional experience as a Web Developer, I have worked extensively with Linux and Windows server environments. I have deployed and maintained applications on Linux servers using Nginx, Apache, and Docker, and have configured CI/CD pipelines to streamline releases. I have also managed virtualization setups and monitored system performance to ensure high availability and quick incident resolution.

One area that particularly interests me is cybersecurity. I have built systems with role-based access control, authentication mechanisms, and secure communication protocols. I understand the importance of firewalls, access controls, and monitoring tools in protecting infrastructure from threats. My work on projects involving real-time server health monitoring and secure data handling has given me practical experience in maintaining resilient systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my infrastructure and systems experience can support Monde Nissin Corporation’s IT operations.

Sincerely,

Md Shahanur Islam Shagor
