I am writing to apply for the Head of Creative Campaigns role at Weflow. Your Revenue AI Platform is solving a real problem for sales teams, and I find the challenge of turning product capabilities into campaigns that generate genuine buzz compelling.

My background is in full-stack engineering, but I have consistently operated at the intersection of building and storytelling. In my previous work, I have taken products from initial concept to live deployment, coordinating design, development, and distribution across multiple stakeholders. This has given me strong instincts for what makes an idea land and the operational discipline to ship it.

One area that particularly interests me is the full campaign lifecycle. I am comfortable writing briefs and copy, working with designers to bring concepts to life, and measuring what worked afterward. I have experience producing assets, coordinating moving parts, and driving distribution through channels that others might overlook.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Weflow’s creative campaigns.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
