I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Zschopau. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in digital workflows, automation, and secure data handling that aligns with the modern, digitally-driven environment your partner firm offers.

Through my work as a full-stack and AI engineer, I have developed systems that require precision, reliability, and clear communication across teams. I am accustomed to working with sensitive data, implementing role-based access controls, and building automation that reduces manual effort. These skills translate well into a tax advisory context where accuracy, efficiency, and digital process optimization are essential.

One area that particularly interests me is the opportunity to work in a firm that values digital transformation and flexible work arrangements. I have hands-on experience deploying and maintaining applications on cloud infrastructure, managing databases, and ensuring data integrity through secure authentication and encryption practices. I am confident I can contribute to streamlining internal workflows and supporting the firm’s digital tools.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in digital systems and process automation could support your partner firm’s operations in Zschopau.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
