I am writing to apply for the Steuerberater position in Stahnsdorf. While my professional background is in software engineering rather than tax consulting, I bring strong technical skills in building digital platforms, automating workflows, and working with complex data systems.

Through my work as a Web Developer, I have built full-stack applications using Laravel, Next.js, and React, and deployed them on Linux servers with Docker and CI/CD pipelines. I am comfortable working with databases, APIs, and role-based access control systems that require precision and reliability.

One area that particularly interests me is the emphasis on digital working methods and modern tools. I have experience developing AI-powered applications that automate document generation, data processing, and real-time communication. I am confident I can contribute to improving digital processes and operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical skills could support your partner firm in Stahnsdorf.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
