I am writing to express my interest in the Steuerberater (m/w/d) position for a partner firm in Sobernheim, as advertised by Taxtalente.de. While my professional background is in software engineering rather than tax advisory, I bring a strong orientation toward digital processes, careful work habits, and a proven ability to handle complex, detail-oriented tasks.

Through my work as a Web Developer, I have developed a systematic and thorough approach to problem-solving. I am comfortable working with modern digital tools and platforms, and I value efficiency and accuracy in everything I build. These qualities align well with the careful, gewissenhafte Arbeitsweise required in tax consulting.

One area that particularly interests me is the opportunity to work in a digitally advanced firm with modern equipment and streamlined processes. I have hands-on experience with Linux servers, Docker, CI/CD pipelines, and cloud deployment, which means I can adapt quickly to digital workflows and contribute to maintaining an efficient, technology-supported environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and working style could contribute to your partner firm in Sobernheim.

Sincerely,

Md Shahanur Islam Shagor
