I am writing to apply for the Entry Level Administrative Assistant position at Recruitlytixs HR. This role appeals to me because it offers a structured entry point into digital operations and data management, areas where I have developed practical skills through my technical background.

Through my experience as a Web Developer, I have developed strong attention to detail and accuracy when working with data. I regularly performed data entry, maintained records across internal systems, updated spreadsheets and documentation, and organized digital files to ensure information was easy to access. These tasks required consistency, clear communication, and the ability to follow structured workflows.

One area that particularly interests me is the emphasis on task coordination and maintaining organized systems. In my previous roles, I supported teams by keeping structured and up-to-date information, monitoring task completion, and flagging inconsistencies for correction. I am comfortable working with spreadsheets and internal tracking tools, and I am confident I can quickly adapt to your specific systems.

In addition to my organizational skills, I work effectively in remote environments and communicate clearly with team members. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international settings. I am self-motivated and ready to learn your workflows with the training provided.

I have attached my CV for your review and look forward to the possibility of contributing to your team.

MAJESTIC

Sincerely,

Md Shahanur Islam Shagor
