I am writing to apply for the Junior Graphic Designer role at Work Force Nexus. The position caught my attention because it combines creative design with practical execution, an area where my development background offers a strong foundation.

Through my work as a full-stack developer, I have built responsive and visually consistent interfaces using tools like Figma, Tailwind CSS, and Bootstrap. I understand how design translates into code and how user experience decisions affect real applications. This perspective allows me to contribute not just to visual design but also to how designs function across devices.

In previous projects, I designed and implemented complete UI systems for web applications, ensuring consistency, accessibility, and clean layout structures. I am comfortable iterating on designs based on feedback and working within brand guidelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my design and development experience can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
