I am writing to apply for the Strategy and Engagement Officer position at the Ministry of Housing, Communities and Local Government. The role's focus on supporting devolution, intergovernmental working, and stakeholder engagement across Scotland, Wales, and Northern Ireland aligns with my experience in coordinating complex projects and communicating effectively with diverse audiences.

Through my professional experience as a Web Developer, I have developed strong organisational and communication skills. I worked across multiple teams, managed competing priorities, and ensured alignment with stakeholder requirements and project goals. This required clear written and verbal communication, proactive planning, and the ability to adapt to different audiences.

One area that particularly interests me is using AI and other tools to improve information management and reporting. I have hands-on experience integrating AI into practical systems, including building AI-powered assistants and automating workflows. I am confident I can contribute to ensuring products and tools are kept up to date and accurate, as outlined in the role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and experience can support the work of the Nations Strategy and Engagement Team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
