I am writing to apply for the Projektmanager/in Dienstleistersteuerung position at BELKAW GmbH. Your focus on managing external service providers and coordinating cross-functional projects in the energy sector is a challenge I find genuinely interesting.

Through my professional experience as a Web Developer, I have taken on responsibilities that go beyond pure technical delivery. I have planned and monitored project timelines, coordinated with external partners, and ensured that outsourced work met quality and budget expectations. This has given me practical experience in managing service providers and maintaining clear communication between internal teams and external stakeholders.

One area that particularly interests me is building transparency around project progress, costs, and risks. In previous work, I developed tracking instruments and status reports to monitor performance metrics and identify deviations early. I have experience analyzing project data, preparing decision-making materials for management, and leading regular coordination meetings with both internal and external participants.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination experience can contribute to BELKAW’s service provider management.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
