I am writing to apply for the Grafiker & Video Creator position at InkuPlay UG. Your focus on building strong digital brands and professional esports structures in a startup environment is exactly the kind of creative challenge I am looking for.

Through my work as a full-stack developer, I have developed a strong sense of visual design and user experience. I have used tools like Figma to create layouts and interfaces, and I have a solid understanding of typography, color theory, and branding principles. My experience with HTML, CSS, and Tailwind CSS has given me the ability to translate design concepts into polished, responsive visuals.

I understand the gaming and esports landscape well. I am comfortable creating graphics for social media, banners, thumbnails, and other visual assets that fit the fast-moving nature of gaming content. I also have experience working with video content and can support the creation of short-form videos, reels, and highlight clips.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to InkuPlay’s visual identity and content creation efforts.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
