I am writing to apply for the Assistenz der Geschˆftsfˆ…hrung (m/w/d) position at Medi-Manage Innovation GmbH. Your focus on medical device technology, process optimization, and strategic scaling in a small, innovative team is exactly the kind of environment where I can contribute meaningfully while growing toward a future leadership role.

Through my professional experience as a Web Developer, I have developed a structured, analytical approach to building systems that improve operational efficiency. I have designed and deployed scalable web applications, built RESTful APIs, and implemented role-based access control and secure payment gateways. These projects required me to define clear workflows, track KPIs, and automate repetitive tasks â skills that directly translate to your need for process standardization and automation.

One area that particularly interests me is your goal to decouple 90% of operational tasks from the Geschˆftsfˆ…hrung through process automation. In my previous work, I optimized application performance through query tuning, caching strategies, and database indexing. I also delivered real-time features using WebSockets and deployed applications on Linux servers with CI/CD pipelines. This experience has given me a practical understanding of how to design systems that reduce manual overhead and improve team efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in process automation, KPI-driven reporting, and project coordination can support the growth and operational goals of Medi-Manage Innovation GmbH.

Sincerely,

Md Shahanur Islam Shagor
