I am writing to apply for the Certified CMMC Assessor position at OCT Consulting, LLC. Your firm's focus on supporting Federal Government clients with cybersecurity and compliance services is an area where I have developed relevant research and technical experience.

Through my academic research and hands-on project work, I have focused on cybersecurity, secure communications, and privacy-preserving systems. I have designed and implemented a blockchain-based security framework for autonomous vehicle networks that ensures data integrity, anonymity, and resilience against cyber threats. This work involved cryptographic chaining, post-quantum cryptography, and Zero-Knowledge Proofs, giving me practical exposure to security control implementation and documentation.

One area that particularly interests me is the structured assessment methodology outlined for this role. My experience examining system architectures, testing security controls, and documenting findings with supporting evidence maps directly to the CMMC Level 2 assessment activities. I am comfortable working with detailed compliance requirements and maintaining accurate records in accordance with established procedures.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in cybersecurity and secure systems can contribute to OCT's C3PAO practice.

Sincerely,

Md Shahanur Islam Shagor
