I am writing to apply for the Live Chat Support position at Ateneo de Manila University. Your focus on providing comprehensive client support, creating self-service materials, and improving client experiences aligns well with my background in client-facing communication and problem-solving.

Through my professional experience as a Web Developer, I have developed strong written and verbal communication skills by collaborating with cross-functional teams, addressing client concerns, and acting as a liaison between clients and internal teams. I am comfortable using live chat platforms and phone calls to engage with clients, and I prioritize both speed and quality in my responses.

One area that particularly interests me is creating materials that help clients help themselves. In previous roles, I contributed to documentation and process improvements that reduced repetitive inquiries and empowered users to find answers independently. I am confident I can apply this same approach to creating one-page guides, tutorial videos, and template messages for your team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your client support team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
