I am writing to express my interest in the Care Coordinator role at Empassion Health. Your startup's focus on making a meaningful impact in healthcare is something I find genuinely compelling.

In my previous work as a Web Developer, I coordinated across product delivery, backend features, and frontend improvements while collaborating closely with stakeholders and engineering teammates. This experience required clear communication, task prioritization, and the ability to keep projects moving forward even when requirements shifted.

One area that particularly interests me is how technology can improve patient coordination and care workflows. While my background is technical, I have consistently worked in roles that demanded strong organizational skills, attention to detail, and the ability to manage multiple responsibilities simultaneously.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my coordination skills and technical background could contribute to Empassion Health's mission.

Sincerely,

Md Shahanur Islam Shagor
