I am writing to register my interest in joining CREW's professional pilot network. My background combines software engineering with hands-on research in autonomous systems, UAV communications, and secure navigation technologies.

Through my research at Voronezh State University, I have worked on secure UAV systems, focusing on decentralized swarm coordination and GPS-denied navigation techniques. This work involved sensor fusion, vision-based approaches, and designing secure communication protocols using encryption for drone-to-drone interaction.

One area that particularly interests me is the intersection of autonomous systems and operational reliability. My project work on the Wireless Vision-Aid for the Blind involved building a real-time object detection system using YOLOv8n on edge hardware, achieving low-latency performance with complete offline functionality. This required careful system design, real-time data processing, and robust communication between distributed components.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to hearing from your team.

Sincerely,

Md Shahanur Islam Shagor
