I am writing to express my interest in the Building Official 3 Inspections position at the City of New Westminster. While my professional background is in software engineering, I bring a strong foundation in analytical thinking, systematic evaluation, and regulatory compliance that translates well into inspection work.

Through my experience as a Web Developer, I have developed a meticulous approach to reviewing systems against specifications and standards. This involved detailed code reviews, testing procedures, and ensuring that every component met required criteria before deployment. These skills in systematic evaluation and attention to detail are directly applicable to building inspections.

I have worked on projects that required careful documentation, adherence to safety protocols, and clear communication of findings to stakeholders. My ability to analyze complex systems, identify issues, and document them clearly would serve me well in conducting thorough building inspections and preparing accurate reports.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
