I am writing to apply for the Director of Communications role at Wing. Wing's mission to make drone delivery a trusted everyday service through safe, automated last-mile logistics is exactly the kind of challenge where technical understanding and clear communication must work together. As someone who researches UAV systems and builds software for real-world deployment, I appreciate the complexity of normalizing autonomous technology for consumers, regulators, and enterprise partners.

Through my research and development work in UAV systems, I have gained direct experience with the technologies that power drone delivery. My work on secure communication protocols for drone-to-drone interaction, GPS-denied navigation techniques, and decentralized swarm coordination has given me a practical understanding of the technical challenges Wing faces daily. This background allows me to distill complex autonomous systems into authentic stories that resonate with technical and non-technical audiences alike.

One area that particularly interests me is translating highly technical autonomous capabilities into messages that build consumer trust and regulatory confidence. In my research on privacy-preserving frameworks for autonomous vehicle networks, I have worked on communicating security and reliability concepts to diverse stakeholders. This experience directly supports Wing's need to address community concerns about noise, privacy, and airspace safety while maintaining the innovative factor of the service.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am based remotely and comfortable working across time zones.

I have attached my CV for your review and welcome the opportunity to discuss how my background in autonomous systems and technical communication can support Wing's expansion into complex metropolitan markets.

Sincerely,

Md Shahanur Islam Shagor
