I am writing to apply for the Marketing Assistant position at Brooklyn Cured. Your focus on building a strong brand presence through creative storytelling, data-driven insights, and organized project coordination aligns with my skills and interests.

While my professional background is in software engineering, I have consistently worked with data, presentations, and cross-functional coordination. In my previous roles, I analyzed data to support decision-making, created reports and visual materials, and managed multiple projects with strict timelines. These experiences have given me a strong foundation in the organizational and analytical skills this role requires.

One area that particularly interests me is coordinating new label and packaging projects. I have experience managing complex workflows involving multiple stakeholders, revisions, and approvals. I am comfortable communicating with designers, printers, and partners to ensure projects move forward smoothly and on schedule.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Brooklyn Cured’s marketing and brand initiatives.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
