I am writing to apply for the Fashion Product Merchandising Manager Italy Market position at CHANEL. While my professional background is rooted in software engineering and AI, I bring a strong analytical mindset, data-driven approach, and experience working with cross-functional teams that I believe can contribute to CHANEL's product strategy and boutique performance.

CHANEL's commitment to craftsmanship, innovation, and the "Creation-first" model is something I deeply respect. The opportunity to support boutique teams in defining assortments that reflect local realities while aligning with global strategy appeals to my structured way of working and problem-solving approach.

In my professional experience, I have built systems that monitor performance metrics, analyze trends, and generate actionable insights. I am accustomed to working with data to identify optimization opportunities and drive decisions. This analytical foundation, combined with my ability to communicate clearly with diverse stakeholders, positions me to contribute to performance monitoring, stock optimization, and buying cycle coordination.

I have worked closely with teams across different functions, from engineering to business operations, and understand the importance of collaboration in achieving shared goals. I am fluent in English and Bengali, have working knowledge of Russian and Hindi, and am comfortable working in international and multicultural environments.

I am eager to bring my analytical skills, service-oriented mindset, and enthusiasm for innovation to CHANEL's Italian market team. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to the continued success of the Fashion Product Merchandising team.

Sincerely,

Md Shahanur Islam Shagor
