I am writing to apply for the Account Manager / Consultant (m/w/x) - Digital position at LINGNER.COM. Your focus on integrating social media, web presence, and AI visibility for international B2B clients aligns well with my background in full-stack development and digital project delivery.

Through my professional experience as a Web Developer at Explo-IT and DataSoft LTD, I have spent over 4 years building and managing digital platforms for clients. I have worked extensively with Laravel and Next.js to develop web applications, integrated RESTful APIs, and ensured responsive, SEO-friendly interfaces using Tailwind CSS and modern JavaScript frameworks. This technical foundation allows me to understand the full lifecycle of web projects and communicate effectively with both development teams and clients.

One area that particularly interests me is the strategic development of web presences. In my previous work, I have managed the ongoing maintenance and feature enhancements of client websites, coordinated with cross-functional teams, and delivered projects on schedule. I am comfortable taking ownership of client accounts, from briefing to reporting, and translating business requirements into actionable digital solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to LINGNER.COM and your clients' digital success.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
