I am writing to apply for the Junior/ Senior Key Account Manager position at LK Recruiting GmbH. Your model of delivering qualified candidates with performance guarantees is a smart approach, and I am interested in contributing to a growing digital agency that values client success and long-term relationships.

In my previous role as a Web Developer at Explo-IT, I worked closely with clients and internal teams to deliver web applications. This required me to understand client requirements, communicate clearly across departments, and coordinate with project management and development teams to ensure smooth delivery. I learned to manage expectations, identify opportunities for additional value, and maintain strong working relationships.

One area that particularly interests me is the strategic advisory aspect of this role. I am accustomed to thinking analytically about client needs and proposing solutions that go beyond the initial request. Whether it was suggesting a new feature or optimizing an existing workflow, I have consistently looked for ways to help clients achieve better outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my communication skills, structured thinking, and client-focused approach would allow me to build strong relationships with your clients and contribute to the growth of LK Recruiting. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
