I am writing to apply for the Director of Sales (m/w/d) position at Falk Defence GmbH. Your work on advanced missile, guided projectile, and launch systems for defence applications is directly relevant to my research and development experience in secure autonomous systems and real-time communication frameworks.

Through my research and development work, I have designed and implemented secure communication protocols for UAV networks, focusing on data integrity, authentication, and resilience against adversarial conditions. This includes building decentralized coordination systems and GPS-denied navigation techniques that combine sensor fusion and vision-based approaches. These systems require the same level of reliability, security, and mission-critical thinking that Falk Defence demands in its products.

One area that particularly interests me is the intersection of technical systems and stakeholder communication. In my work on the OmniGuard V2X framework, I collaborated with cross-functional teams to integrate blockchain-based security, post-quantum cryptography, and real-time data validation into a single architecture. This required translating complex technical concepts into clear, actionable plans for both engineering and non-engineering partners.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in secure autonomous systems and cross-functional coordination can contribute to Falk Defence’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
