I am writing to apply for the Chief of Staff position at Falk Defence GmbH. Your work on advanced missile, guided weapon, and launch systems for defense applications is directly relevant to my background in autonomous systems, secure communications, and distributed coordination. I am interested in contributing to a company that builds mission-critical technologies with real security impact.

My technical foundation is in software engineering with a focus on autonomous systems and cybersecurity. Through research and development work, I have designed secure communication protocols for UAV networks, built privacy-preserving blockchain frameworks for vehicle-to-everything (V2X) systems, and developed real-time object detection pipelines using YOLOv8n and edge computing hardware like the NVIDIA Jetson Nano and Raspberry Pi. These projects required me to work across hardware, firmware, and application layers while maintaining a clear focus on reliability and security.

One area that particularly interests me is the operational side of scaling a defense technology company. In my professional experience as a Web Developer, I delivered full-stack applications end-to-end, coordinated with stakeholders, managed project priorities, and improved internal workflows. I am comfortable identifying inefficiencies, driving cross-functional projects, and ensuring that technical and business teams stay aligned on shared goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can support Falk Defence’s mission and growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
