I am writing to express my interest in the Steuerberater position at Taxtalente.de. Although my professional background is in software engineering, I am drawn to the opportunity to work in a digitally forward-thinking firm that values flexibility, clear communication, and a structured approach to complex work.

Through my professional experience as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and Node.js. I have implemented secure authentication, role-based access control, and payment integrations, and I have deployed applications on Linux servers with Docker and Nginx. I am comfortable working with digital tools, managing remote workflows, and ensuring system reliability.

One area that particularly interests me is the emphasis on digital processes and modern working methods mentioned in your description. I have hands-on experience with cloud infrastructure (AWS, Google Cloud), CI/CD pipelines, and real-time communication systems. I am confident I can adapt quickly to your firm’s digital environment and contribute to efficient, technology-supported workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in building reliable digital systems can support your firm’s operations.

Sincerely,

Md Shahanur Islam Shagor
