I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring strong digital expertise and a systematic approach to problem-solving that aligns with your emphasis on digital workflows and modern working environments.

Through my professional experience as a Web Developer, I have built and maintained secure, scalable web applications using Laravel, Next.js, and cloud infrastructure. I have implemented role-based access control, authentication systems, and payment integrations, all of which require a careful, precise, and security-conscious mindset. These skills translate directly to supporting a digitally advanced tax firm where accuracy and reliability are essential.

One area that particularly interests me is the opportunity to work in a firm that values digital processes and modern equipment. I have hands-on experience deploying applications on Linux servers with Docker, Nginx, and CI/CD pipelines, and I am comfortable working with cloud platforms like AWS and Google Cloud. I am confident I can contribute to maintaining and improving the digital infrastructure of your partner firm.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
