I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de for a partner firm in Idar-Oberstein. Although my professional background is in software engineering, I bring strong capabilities in digital process design, data integrity, and secure system management that align well with the modern, digitally-driven environment your partner firm offers.

Through my work as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and MySQL, focusing on reliable data handling, role-based access control, and secure authentication. These experiences have given me a disciplined approach to accuracy, system reliability, and efficient workflows, which are directly relevant to preparing and reviewing financial statements and tax declarations.

One area that particularly interests me is the emphasis on individually selectable responsibilities and a digital working style. I have experience deploying applications on Linux servers with Docker and Nginx, and I am comfortable working with modern digital tools and processes. My technical background allows me to quickly adapt to new software and optimize workflows for efficiency and precision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, attention to detail, and openness to digital processes would make me a valuable addition to your partner firm. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
