I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Waldkirch. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in digital process design, secure systems, and automation that aligns well with the firm's emphasis on modern, digital working methods.

Through my work as a Web Developer, I have built and maintained full-stack applications using Laravel, Next.js, and cloud infrastructure on AWS and Linux servers. I have implemented role-based access control, payment gateways, real-time features, and database optimization. These experiences have given me a disciplined, detail-oriented approach to building reliable systems that serve real users.

One area that particularly interests me is the opportunity to work in a digitally progressive environment. I am comfortable with modern tools, automated workflows, and collaborative platforms. I have deployed applications with Docker, managed CI/CD pipelines, and worked with monitoring tools like Prometheus and Grafana. I am confident I can adapt quickly to the digital tools used in the firm.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in digital systems and process optimization could contribute to the firm's continued success.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
