I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Berlin. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in digital process optimization, secure system design, and data management that aligns with the firm's emphasis on a digital working style.

Through my professional experience as a Web Developer, I have designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication and role-based access control systems. I have also optimized application performance through database indexing and caching strategies. These skills translate directly to building and maintaining efficient, secure digital workflows.

One area that particularly interests me is the opportunity to apply my technical expertise to support the firm's digital transformation. I have experience deploying and maintaining applications on Linux servers with Nginx and Docker, and I am comfortable working with modern tools and processes. I am confident I can contribute to creating streamlined, technology-driven solutions for tax consulting operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application, and I look forward to the possibility of discussing how I can contribute to your partner firm in Berlin.

Sincerely,

Md Shahanur Islam Shagor
