I am writing to apply for the Assistant Store Manager position at Ross Stores, Inc. Ross is a Fortune 500 company with a strong track record of growth and a commitment to its people, and I am drawn to the opportunity to contribute to a team that values excellence, teamwork, and continuous learning.

My professional background has been in software engineering, where I have spent over four years building scalable web applications and leading technical projects from concept to deployment. Through this work, I have developed strong skills in process management, team coordination, and operational efficiency. I am accustomed to managing multiple priorities, communicating clearly with diverse stakeholders, and ensuring that projects are delivered on time and to a high standard.

One area that particularly interests me is the emphasis on leading by example and ensuring accountability. In my previous role as a Web Developer at Explo-IT, I collaborated closely with cross-functional teams, coordinated with stakeholders to define requirements, and maintained a focus on quality and continuous improvement. I am confident that these skills translate directly to supervising store associates, managing schedules, and maintaining a clean, safe, and customer-focused environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to the Ross team.

Sincerely,

Md Shahanur Islam Shagor
