I am writing to apply for the Manufacturing Operator I position at Eaton. The role's focus on machine operation, assembly, quality assurance, and safety procedures aligns with my hands-on technical background and my ability to work methodically under supervision.

Through my previous work in software engineering and hardware integration projects, I have developed a disciplined approach to following procedures, maintaining equipment, and documenting results. I am comfortable using basic web tools for record-keeping and have experience working with tools and assembly tasks in technical settings.

One area that particularly interests me is the emphasis on quality and safety in manufacturing environments. I have consistently maintained clean and organized workspaces, followed detailed specifications, and ensured that all tasks meet required standards. My experience with hardware setups and sensor integration has given me practical familiarity with tools and assembly processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Eaton's manufacturing operations. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
