I am writing to apply for the Social Media Manager position at Parisa Wang. While my core expertise lies in full-stack development and AI engineering, I bring a strong technical and design-oriented perspective to digital content creation and audience engagement.

In my web development work, I have built responsive, visually polished interfaces using tools like Figma, Tailwind CSS, and Next.js. This experience has given me a deep understanding of how layout, typography, and visual hierarchy affect user experience â skills that translate directly to creating compelling social media content for luxury brands.

I am comfortable working with analytics tools, managing content workflows, and ensuring brand consistency across platforms. My technical background also allows me to automate repetitive tasks, track performance metrics efficiently, and integrate social media tools with backend systems when needed.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
