I am writing to apply for the Content Creator role at Vive Social + PR. Creating engaging digital content that connects with audiences is something I have focused on throughout my development work, and this opportunity aligns well with my experience.

Through my work as a full-stack developer, I have built platforms that require strong visual presentation and user engagement. I have experience designing responsive interfaces using tools like Figma, Tailwind CSS, and Material UI, and I understand how layout, color, and typography affect how content is received. I am comfortable following creative briefs and visual guidelines to produce polished assets.

One area that particularly interests me is the collaborative nature of this role. I have experience attending planning sessions, implementing feedback, and working with teams to align on project requirements. I am organized, track my hours accurately, and maintain clear records of approvals and expenses.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to the creative work at Vive Social + PR.

Sincerely,

Md Shahanur Islam Shagor
