I am writing to apply for the Language Arts Teacher position at Think Academy U.S. Your focus on research-based pedagogy and carefully designed reading experiences for K-12 students is something I find genuinely compelling. As someone who values clear communication and structured learning, I am drawn to the opportunity to help young learners build strong literacy foundations.

Although my professional background is in software engineering, I bring strong native-level English communication skills and a proven ability to learn quickly and adapt to new environments. I have worked in cross-cultural teams across Bangladesh and Russia, which has given me the patience and clarity needed to explain concepts to diverse audiences. I am comfortable with digital tools and virtual classroom management, and I am confident I can quickly master Think Academy's ELA curriculum and teaching platform.

One area that particularly interests me is the emphasis on teaching Reading, Speaking, and Writing to elementary students. I understand the importance of creating engaging, student-centered lessons that build confidence alongside academic skills. My experience collaborating with stakeholders and providing clear, constructive feedback translates well into grading student work and communicating with parents about learning goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to commit to the part-time schedule and contribute to Think Academy's mission of inspired teaching. My CV is attached for your review.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
