I am writing to apply for the Werkstudent Content Creation & Social Media Management position at The SISS BLISS GmbH. Your focus on high-quality, personalized gold jewelry and the strong community-driven brand around #sissterhood is genuinely interesting. I appreciate how you combine sustainability with luxury, and I would welcome the chance to contribute to your marketing team in Berlin.

My background is in software engineering and full-stack development, but I have always had a strong interest in visual design and digital content. I am proficient with Figma for UI and asset design, and I have hands-on experience creating responsive, visually clean interfaces using HTML, CSS, and Tailwind CSS. I understand the importance of aesthetics, composition, and brand consistency in digital media.

Through my project work, I have developed skills in image selection, layout design, and creating user-friendly interfaces that prioritize visual appeal. I am comfortable working with design tools and adapting to new software quickly. I am also experienced in managing digital assets and organizing media libraries for web applications.

In addition to my technical and design skills, I work well in teams and communicate clearly with both technical and non-technical colleagues. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am reliable, creative, and comfortable taking ownership of tasks.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to The SISS BLISS team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
