I am writing to apply for the Performance Marketing Manager position at The SISS BLISS GmbH. Your focus on sustainable luxury, personalized gold jewelry, and a strong social media community is impressive. I am drawn to the combination of brand depth and data-driven growth that defines your approach.

My professional background is in full-stack software engineering, where I have spent over four years building and optimizing web applications, e-commerce platforms, and marketplace systems. I have developed multi-vendor e-commerce ecosystems using Laravel, MySQL, and Flutter, integrating payment gateways, role-based access control, and real-time features. This technical experience gives me a practical understanding of how Shopify stores, landing pages, and conversion funnels operate under the hood.

In previous work, I built a full-stack multi-vendor e-commerce platform that connected customers, sellers, and delivery agents within a unified system. I implemented structured testing workflows for features and performance, and worked closely with teams to iterate quickly based on data. I am comfortable taking ownership of store performance, running systematic tests on creatives and offers, and optimizing campaigns based on clear metrics.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
