I am writing to apply for the Head of Education role at snipKI. Your mission to make AI accessible and useful for companies in the DACH region resonates with me. I have been building AI-powered applications and learning platforms, and I see a strong connection between your work and my experience.

What stands out to me about snipKI is the focus on creating current, tailored learning experiences rather than generic training. The idea of building programs like the KI-Fˆ…hrerschein and Agent Builder that evolve with the fast-moving AI landscape is exactly the kind of challenge I want to take on. I am not an educator by title, but I have spent years learning, building, and teaching myself complex technical systems, and I understand how to make difficult concepts accessible.

Through my professional experience as a full-stack and AI engineer, I have built several AI-integrated platforms from the ground up. I developed an AI-powered financial application that used OpenAI assistants, AWS Transcribe for voice processing, and automated PDF generation. I also built an AI-powered real estate platform with role-based access, subscription plans, and Stripe payment integration. These projects required me to think about user experience, content structure, and how to make AI features genuinely useful rather than just technically impressive.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can contribute to snipKI’s education programs by combining my AI engineering background with a practical, user-focused approach to learning design. I have attached my CV for your review and would welcome the opportunity to discuss how I can help build the next generation of your learning formats.

Sincerely,

Md Shahanur Islam Shagor
