I am writing to apply for the Head of Content (m/w/d) position at snipKI. Your mission to make AI accessible and productive for companies in the DACH region is something I find genuinely compelling. The idea of building a trusted media brand around AI enablement, with hands-on content production across multiple channels, aligns directly with how I work.

I use AI tools daily for content creation. In my projects, I have integrated OpenAI and Replicate API to generate text, process images, and build intelligent assistants. I am comfortable writing, editing, and refining content produced by AI systems, and I know how to take raw output and shape it into something polished and on-brand. I also have experience with visual design tools like Figma and understand what works across different platforms.

What stands out to me about this role is the combination of strategy and hands-on execution. I am used to owning the full lifecycle of a project: taking an idea, deciding which channel it belongs on, producing the content, and publishing it. I work independently, move quickly, and do not wait for detailed instructions to start delivering.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to building snipKI into the leading AI brand in the DACH region.

Sincerely,

Md Shahanur Islam Shagor
