I am writing to apply for the Grafik Designer / Mediengestalter position at LK Recruiting GmbH. Your focus on design talent over marketing experience aligns with my own approach: I believe strong visual fundamentals matter most, and platform-specific knowledge can be learned.

Through my work as a full-stack developer, I have developed a strong sense of visual design, layout, and typography. I regularly use Figma for UI/UX design, prototyping, and creating consistent visual systems. I have also built responsive interfaces using Tailwind CSS, MaterialUI, and Bootstrap, ensuring that every component is visually coherent and aligned with brand guidelines.

What stands out to me about this role is the emphasis on creative execution rather than campaign management. I enjoy working on templates, refining visual assets, and maintaining brand consistency. I am comfortable working under time pressure and delivering structured, reliable output.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my design skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
