I am writing to express my interest in the TRANSPORT position at Mississippi Army National Guard Biloxi Office. The role requires operational agility, strength, and intelligence to move equipment and personnel effectively, qualities I have developed through hands-on technical work and research.

Through my research and development work in UAV systems, I have gained practical experience with GPS-denied navigation techniques, sensor fusion, and real-time data integrity. These skills directly translate to operating vehicles and equipment in complex environments where reliable navigation and coordination are critical.

In previous work, I have maintained Linux servers, configured Nginx and Apache, and deployed applications using Docker and CI/CD pipelines. This technical foundation supports the kind of operational readiness and system reliability that transportation roles demand.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can contribute to the Guard’s mission.
