I am writing to express my interest in joining Valpak of Southeastern Wisconsin in a corporate capacity. Your organization's commitment to empowering local businesses and communities through trusted connections resonates with my own approach to building technology that serves real people and solves practical problems.

Through my professional experience as a Web Developer, I have spent over four years building and maintaining full-stack web applications. My technical foundation includes Laravel and PHP for backend development, Next.js and React for frontend interfaces, and MySQL and PostgreSQL for database management. I have worked extensively with RESTful APIs, authentication systems, role-based access control, and payment gateway integrations in production environments.

One area that particularly interests me is the ITSS division at Valpak. In my previous roles, I deployed and maintained applications on Linux servers using Docker, Nginx, Apache, and CI/CD pipelines. I have experience with cloud platforms including AWS and Google Cloud, and I have implemented real-time features using WebSockets and Socket.IO. I also worked on server monitoring and health tracking systems that provided live metrics and alerts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background can contribute to Valpak's corporate operations and IT initiatives.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
