I am writing to apply for the Retoucher position at Agency MJ. While my professional background is in software engineering and full-stack development, I bring a strong foundation in visual detail, color theory, and AI-generated image editing that aligns with the responsibilities of this role.

Through my work on the AI Powered Real Estate project, I integrated the Replicate API for AI-based image processing and worked extensively with visual content. This experience gave me practical exposure to editing and enhancing AI-generated imagery, a preferred qualification for this position. I am comfortable working with image quality, consistency, and brand-aligned visual output.

In my UI/UX design work using Figma, I developed a strong understanding of color theory, layout consistency, and visual hierarchy. These skills translate directly to maintaining brand imagery standards and executing color correction work. I am detail-oriented and accustomed to delivering high-quality results under tight deadlines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
