I am writing to apply for the Senior UX/UI Designer / Product Designer role at ALL4GOLF Golfversand Hannover GmbH. Your focus on creating intuitive, data-informed shopping experiences for golfers aligns with how I approach design: understanding user behavior, identifying friction points, and building interfaces that feel natural to use.

Through my work on full-stack web applications, I have developed a practical understanding of UX/UI design principles. I regularly use Figma to create wireframes, interactive prototypes, and component-based design systems. I am comfortable working with auto layout, variants, and prototyping to communicate interaction concepts clearly before development begins.

One area that particularly interests me is optimizing conversion-focused flows like navigation, product pages, and checkout. In previous projects, I have built responsive e-commerce interfaces where I focused on simplifying user journeys and improving the overall shopping experience. I also have working knowledge of HTML and CSS, which helps me collaborate effectively with development teams during implementation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I would welcome the opportunity to discuss how my design approach can contribute to ALL4GOLF’s customer experience.

Sincerely,

Md Shahanur Islam Shagor
