I am writing to apply for the Ingenieur:in MSR-Technik - Automatisierung & Leittechnik position at BTB Berlin GmbH. Your work in developing intelligent solutions for energy supply and managing complex energy systems is impressive, and I am interested in contributing to your team.

Through my professional experience, I have developed a strong foundation in building and maintaining reliable systems. I have worked extensively with Linux server environments, Docker containerization, and Nginx for deployment and monitoring. These skills directly support the IT and automation infrastructure that MSR and leittechnische Anlagen depend on.

A relevant example is a project where I built a Real-Time Server Health Monitoring dashboard. I used Node.js, Express, Socket.IO, and Docker to track the availability and latency of multiple systems simultaneously. This involved setting up live data streaming, managing system metrics, and ensuring continuous uptime monitoring. This experience has given me practical knowledge in maintaining operational systems and troubleshooting performance issues.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to BTB Berlin GmbH.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
