I am writing to apply for the Marketing Intern position at Lassie. Your mission to help pet parents provide the best care for their dogs and cats through innovative insurance solutions is genuinely inspiring. I am drawn to the opportunity to contribute to real campaigns and projects while learning from a high-performing team.

As a software engineering student with hands-on experience building full-stack web applications, I have developed strong skills in content creation, user engagement, and digital communication. I built and maintained the frontend of a travel agency platform using Next.js and Tailwind CSS, which required creating visually appealing, multilingual content and ensuring a seamless user experience across different markets.

One area that particularly interests me is community management and social media. In my project work, I have consistently focused on understanding user needs and creating interfaces that communicate clearly and effectively. I am comfortable working with tools like Canva, Google Sheets, and various content management systems, and I am eager to apply these skills to support Lassie's brand across multiple channels.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my creativity, curiosity, and structured approach to the Marketing Intern role at Lassie. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
