I am writing to apply for the Bauleiter*in Photovoltaik position at greentech corporate solutions GmbH. Your focus on delivering turnkey photovoltaic systems at megawatt scale aligns with my experience in managing complex, multi-stakeholder technical projects from planning through to operational handover.

Although my professional background is in software engineering, I have consistently taken on responsibilities that mirror the core demands of a construction site manager. In my role as a Web Developer, I coordinated project timelines, managed deliverables across multiple teams, and maintained detailed documentation for every phase of development. I ensured that all work met quality standards and regulatory requirements, and I communicated progress clearly to both technical teams and business stakeholders.

One area that particularly interests me is the coordination of on-site activities with external service providers and clients. In previous projects, I was responsible for organizing regular progress meetings, tracking issues and delays, and conducting final acceptance checks with stakeholders. This experience has prepared me to handle the coordination, reporting, and quality assurance responsibilities outlined in your job description.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills, attention to detail, and willingness to travel extensively to support your photovoltaic projects across Germany. I have attached my CV for your review and look forward to discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
