I am writing to apply for the (Senior) Creator Manager position at ADBAKER. Your focus on building high-performance creator networks for TikTok Shop in Germany is impressive, and I appreciate the hands-on, results-driven culture you describe.

Although my professional background is in software engineering, I bring transferable strengths that directly support this role. Over the past four years, I have worked in cross-functional teams where I managed multiple projects, coordinated with stakeholders, tracked performance data, and continuously optimized workflows. These experiences have built the organizational discipline, communication skills, and data comfort that creator management demands.

One area that particularly interests me is the performance and optimization aspect of this role. In my development work, I consistently tracked metrics, analyzed what worked, and iterated to improve outcomes. I am comfortable working with numbers, identifying trends, and using data to make better decisions. I also have a natural ability to communicate clearly with different audiences, whether technical teammates or external partners.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills, data-driven approach, and hands-on work ethic to ADBAKER. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
