I am writing to apply for the Qualitˆtstechniker / Messtechniker position in medical technology at Franke + Pahl Fachkrˆfte GmbH. Although my professional background is in software engineering, I bring a strong technical foundation, systematic thinking, and a detail-oriented approach that aligns well with quality assurance and measurement tasks.

Through my work as a web developer, I have developed a disciplined approach to testing, validation, and documentation. I have built and maintained production systems where accuracy and reliability were non-negotiable. This experience has trained me to read technical specifications carefully, follow structured workflows, and identify inconsistencies before they become problems.

One area that particularly interests me is the emphasis on first article inspections and supplier quality documentation. In my development work, I regularly reviewed technical requirements, validated outputs against specifications, and coordinated with team members to resolve discrepancies. This process-oriented mindset translates naturally to evaluating measurement results and reviewing EMPB/PPAP documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also actively learning German to strengthen communication in German-speaking workplaces.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical precision and analytical skills can contribute to your quality team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
