I am writing to apply for the Founderâ s Associate - Finance, Operations, HR role at KULT FARM. Your mission to create a sustainable alternative to meat through mycelium fermentation is both ambitious and necessary, and I am drawn to the opportunity to contribute to a venture-backed startup in its earliest days.

My background is in software engineering, where I have developed full-stack applications and data-driven dashboards. For example, I built an AI-powered financial application that involved consolidating data from multiple sources, integrating payment systems, and generating automated reports. I also created a real-time server monitoring dashboard that tracks KPIs, system health, and latency, presenting complex data in clear, actionable visualizations. These experiences have given me strong analytical skills and the ability to translate strategic ideas into operational plans.

In previous work, I have taken ownership of projects from concept to deployment, working directly with stakeholders to define requirements, manage timelines, and deliver results. I am comfortable moving between high-level strategy and detailed execution, whether that means developing business cases, optimizing workflows, or building tools to support decision-making. I have experience with data consolidation, financial modeling, and creating dashboards that drive operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical rigor, operational mindset, and hands-on execution to KULT FARM. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
