I am writing to apply for the Product Owner B2B SaaS Tender Intelligence position at DTAD GmbH. With over 20 years of experience in the tender intelligence space and a platform trusted by more than 13,500 users daily, DTAD has built a strong reputation for helping companies succeed in public sector sales. I find this domain particularly interesting because it combines data intelligence with real business impact.

In my professional experience as a full-stack developer, I have worked closely with product teams to translate customer and business goals into clear, measurable outcomes. I have managed backlogs, prioritized work based on customer value, risk, and urgency, and ensured a smooth flow between operational tasks and new feature initiatives. This hands-on involvement with product workflows has given me a practical understanding of outcome-oriented product work.

One area that aligns well with this role is my experience managing stakeholder expectations across sales, customer success, and engineering teams. I have written user stories with clear acceptance criteria, incorporated customer feedback into product decisions, and used data and usage metrics to guide prioritization. I am comfortable working in flow-based, agile environments and keeping the balance between run-and-ops work and strategic initiatives.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to DTAD’s continued success.

Sincerely,

Md Shahanur Islam Shagor
